

What is a customized fan?

**CUSTOM
FAN**

A customized fan by CUSTOMFAN is a very competitive solution for your project. Whether, your application is live stock ventilation, radiator/heat exchangers, freezing or greenhouses we offer a customized solution.

These are just some examples of CUSTOMFAN solutions.

Advantages of a custom made fan

- ✓ A fan adapted to **your** geometry and not vice versa
- ✓ Maximum performance with Multi-Wing impellers without the need to adapt to a catalogue fan.
- ✓ Selection of motor according to the needs of **your** project, be it power, RPM, quality, etc.

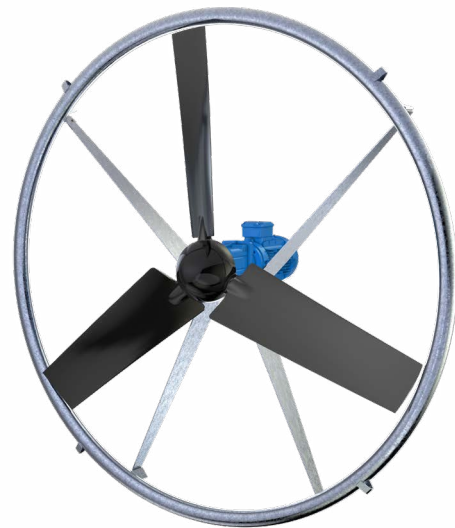

Fan for evaporators

Fan for radiator applications

- ✓ Selection of materials that are necessary for **your** project according to factors such as high/low temperature, ATEX, chemical substances etc
- ✓ Surface treatment of housing, support and grids according to **your** specifications.

Agriculture- and livestock fan

Fan for freezing
