

CUSTOMFAN PRESENTS

A CUSTOM MADE SOLUTION

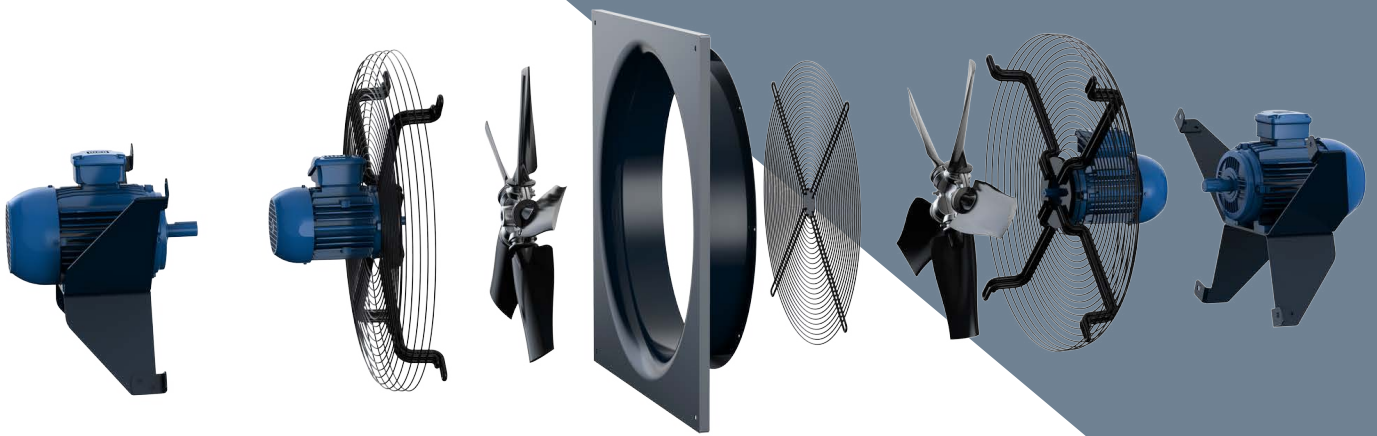

a company of

With Multi-Wing impellers we assure a maximum performance for your application

CUSTOMFAN do much more than a catalogue fan. With the range of Multi-Wing impellers, probably the widest in the world, we create a unique solution for your project. We ensure sufficient airflow and low noise, with an impeller specifically selected for your duty point.

We are capable of providing more flow and pressure.

We search for the ideal solution for your duty point without the need to adapt to a standard fan that can compromise your solution.

Not only do we custom build a fan with enough airflow, we also comply with your dimensional boundaries.

Total flexibility in the range of diameters, motors and working environments.

100 % committed to your project creating a fan specifically designed for your application.

All our engineering resources and test facilities to create the optimal solution for your project.
